

1. This process is only applicable for type strains or new species candidates deposited in the public collection of TBRC.
2. This process is free of charge. TBRC will be responsible for costs relevant to preparation and submission of microorganisms and its data to other biological resource centers (BRCs).
3. After completing deposit process at TBRC, which takes approximately 2 – 3 months, TBRC will deposit microorganisms to well recognized BRCs *e.g.* NBRC, JCM and CBS.
4. Deposit of microorganisms to other BRCs may take few months depending on processes of each BRC. It may take longer for microorganisms that require import permits.
